**Description of Group-House-Village** by the architect Volker Goebel / Dipl.-Ing. / Brunnen, Switzerland / 31. July 2017 / Version 1.0.2

It is 22 Group Houses that can give home to 264 people around a circle - an ideal circle like in an ancient village everywhere in the world.

The houses come with 414 m2 land that is owned by the house owners - in a setting with a lot of Group-House-Community land around.

There is many crop fields of 400 m2 for that the Village people can feed themselves by working on their own agricultural Community land.

The village got roads to walk and to drive on for deliveries. - But basically the village center it is a car free walking zone with children first.

There has to be installed central toilets with septic 3 chamber tanks for the sanitary needs of the 264 people living in Group-House-Village.

All rain water is collected from the roofs into the 6.000 Liter Tanks behind the Group Houses to survive the dry seasons of twice 2 month.

The straight and circle street areas will be marked up and show a different color - but not asphalt, gravel or concrete paving in first years.

There is space in from of the village for companies like a food market, a coffee company, a woodwork company, a fruit juice company ...

The target is to create a Group-House-Village Unit where the people living there find work in the companies just in front of the village.

It is about developing the country side with many options for agricultural work activities and a community size that allows direct democracy

There is a Rent/Buy contract set up to connect new house owners with the local bank and the land owning building contractor company.

The building company is a low profit organization that provides a lot of work places in the building sector and organizes the building work.

We collect water from the company roofs to supply the shower and washing rooms and toilets with water. - 264 people have their needs.

With best regards from the experienced architect and Diploma-Engineer Volker Goebel - Amen - with Richard Mugasho and Jimmy Kasole
