

>>> Ms. Thorne / Request for geological data - Rocksalt New Brunswick

An kay.thorne@gnb.ca

Dear Ms. Thorne,

it was Mr. Jan.Peter@canada.ca who recommended you as an **expert in geology especially for NB, CA**

We have done a repository plan for NWMO based on the information that was given by NWMO, Toronto, CA

Herewith we ask you for geological data on rocksalt for the area of New Brunswick. See what we have :

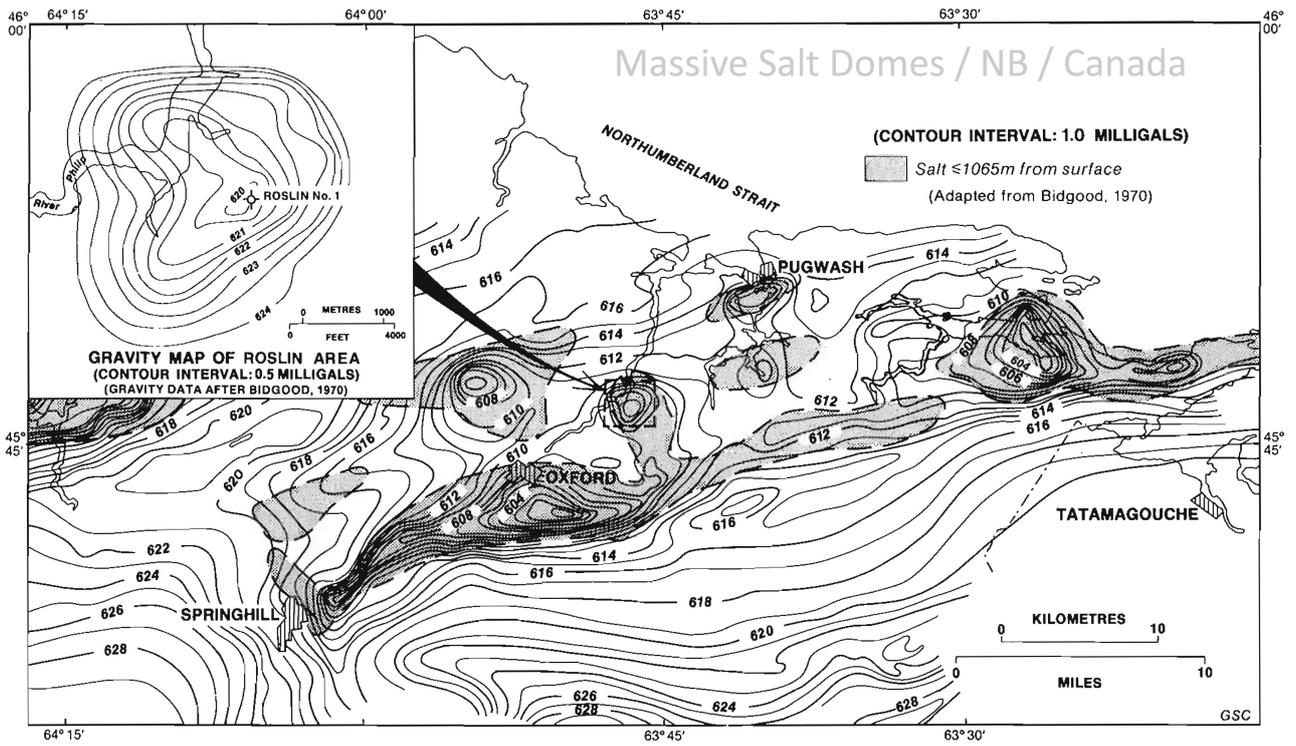

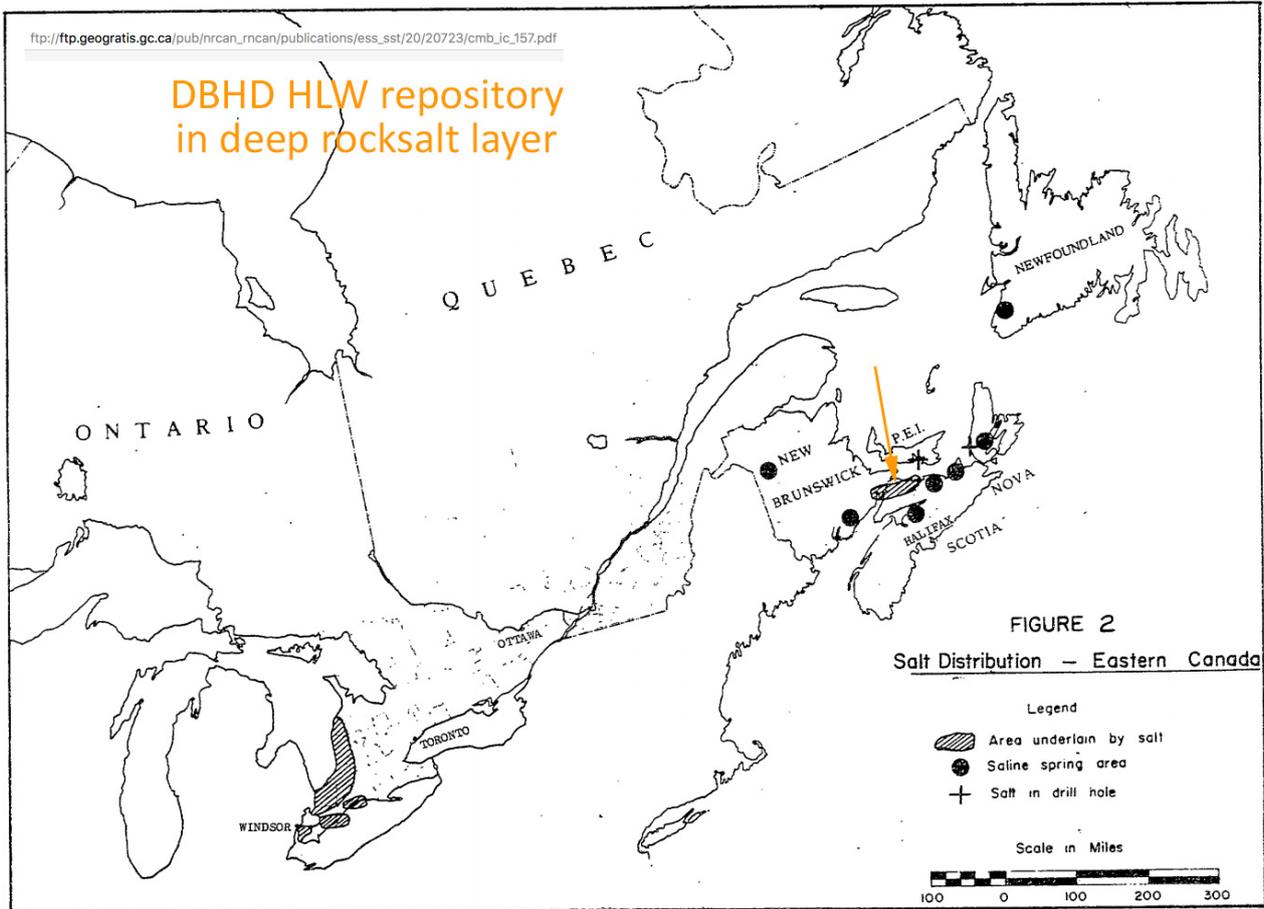

Figure 47. Gravity map, Cumberland subbasin, Nova Scotia.

The Canadian repository 1.4.1 plan was worked out on the base of the German / Switzerland plan - DBHD is a SAFE repository !

There is 600 Mio. CAD radial, honest compensations in the DBHD calculation - it is mainly the DSC ship transports that cause danger

We wish you a nice day - and that spring will soon reach Canada
Please send us rocksalt geology data for New Brunswick please.

With best regards
Volker Goebel / Dipl.-Ing.
